INTRODUCTION

After the age of 60, maintaining balanced blood sugar levels becomes essential for preserving our vitality.

Eating well means:

- Listening to your body's needs
- Stabilizing your energy throughout the day
- Enjoying simple foods chosen to support your well-being

UNDERSTANDING BLOOD SUGAR

Blood sugar refers to the level of glucose present in the bloodstream.

01.

Stable Blood Sugar Level Promotes Energy and Focus.

02.

Fluctuations in blood sugar can lead to symptoms such as fatigue, cravings, irritability, joint pain, and weight gain.

03.

As we age, regulating blood sugar becomes more challenging, highlighting the importance of an appropriate diet.

AN APPLE A DAY – A SIMPLE AND POWERFUL HEALTH HABIT

We've all heard the saying "An apple a day keeps the doctor away"... and there's truth to it! Apples are a low-glycemic fruit, rich in fiber (especially pectin), which helps slow down sugar absorption and stabilize blood sugar levels.

They also support digestive health, reduce cravings, and provide a gentle feeling of fullness. It's an excellent snack option — especially when paired with a bit of protein or healthy fat, like a few nuts or a spoonful of almond butter.

FOODS TO FAVOR AND LIMIT FOR STABLE BLOOD SUGAR

Foods to Favor

- Green vegetables: broccoli, spinach, kale
- Legumes: lentils, chickpeas, black beans
- Nuts and seeds: almonds, walnuts, chia seeds, flaxseeds
- Low-glycemic index fruits: berries (strawberries, raspberries), apples, pears
- Lean proteins: fish, tofu

Foods to Limit

- Refined sugar : sodas, sweetened juices, alcoholic drinks
- Ultra-processed foods
- Refined grains and pastries: wheat, industrial pastries

KEY NUTRIENTS FOR STABLE BLOOD SUGAR

PROTEINS

Slow down carbohydrate absorption

eggs, fish, chicken, tofu, tempeh, legumes (lentils, chickpeas), Greek yogurt, cottage cheese, nuts, and seeds

FIBERS

Reduce blood sugar spikes

Legumes: lentils, chickpeas, black beans
Whole grains: oats, barley, brown rice
Fruits: apples, pears, berries
Vegetables: broccoli, spinach, carrots
Seeds: chia, flax, psyllium

WHOLE GRAINS

Release glucose slowly

Quinoa: Rich in protein and gluten-free
Brown rice: A better option than white rice
Oats: Prefer whole rolled oats
Barley: Contains beneficial beta-glucan fibers
Whole grain bread: Choose breads made from wholemeal flour

HEALTHY FATS

Promote slow sugar absorption

Avocado: Rich in monounsaturated fatty acids
Nuts: Almonds, cashews, walnuts
Seeds: Chia, flax, sunflower
Oils: Extra virgin olive oil, canola oil
Fatty fish: Salmon, mackerel, sardines

 **A small portion 3 to 4 times a week can make a big difference!**

ENJOY EATING (WITHOUT GUILT)

- Rediscover the joy of cooking for yourself
- Eat mindfully: take your time and savor each bite
- Indulge without excess or restrictive dieting
- Share meals with pleasant company
- Prepare meals in community
- Choose fresh, seasonal foods

NOURISHING AND BALANCED MEAL IDEAS

To meet calcium needs without consuming traditional dairy products:

Fortified Plant-Based Beverages

- Soy, almond, oat, or cashew milk
- Choose options fortified with calcium and vitamin D
- Opt for unsweetened varieties

Canned Fish with Soft Bones

- Canned sardines
- Canned salmon with bones
- Excellent natural calcium bioavailability

Calcium-Rich Green Vegetables

- Kale
- Broccoli
- Bok choy (Chinese cabbage)
- Turnip greens, watercress

Nuts and Seeds

- Sesame seeds (and tahini)
- Almonds
- Chia seeds (with added digestive benefits)

Organic Tofu

- Preferably prepared with calcium (check ingredient labels)
- Provides both protein and minerals

Calcium-Rich Mineral Waters

- In Canada: local or imported brands like Eska or San Benedetto Calcium/Check labels for calcium content exceeding 200 mg/L
